#### **FOREWORD**

This Examiners' Report on the performance of the candidates in Civics for the Certificate of Secondary Education Examination (CSEE) 2013 provides some insight into some of the reasons that contribute towards the poor performance in this subject. Extracts of the candidates' responses were analyzed in order to find out the reasons behind the poor performance.

The reasons noted for the poor performance include: lack of knowledge on the topics in the syllabus, inability to identify the tasks of the questions, poor organization of essays and poor English language proficiency.

The report provides feedback to students, teachers, policy makers and other educational stakeholders, so that they can take appropriate measures to improve the performance in this subject.

The National Examinations Council of Tanzania will highly appreciate comments and suggestions from teachers, students and the public in general that can be used to improve future Examiners Reports.

Finally, the Council would like to thank examiners and all people who were involved in the preparation of this report. We would like also to express sincere appreciation to the Department of Information and Communication Technology for the analysis of the data used in the report.

Dr. Charles E. Msonde
ACTING EXECUTIVE SECRETARY

#### 1.0 INTRODUCTION

This report analyses the performance of candidates in Civics for the Certificate of Secondary Education Examination (CSEE) in 2013. The Civics Examination covered the syllabus and adhered to the examination format.

The paper had 10 questions distributed in three sections namely A, B and C. Candidates were required to answer all four questions in sections A and B and to choose any three out of six questions from section C. Section A and B carried 10 marks each while questions in Section C carried 20 marks each.

A total of 352, 373 candidates sat for Civics in 2013 of which 128,239 candidates' (36.42 %) passed. In 2012 the number of candidates who sat for the Civics examination was 396,953 out of which 103,882 candidates (28.02%) passed. This indicates that in 2013 the number of candidates who passed increased by 8.4 percent.

The analysis on individual questions is presented in the next sections. The presentation highlights the requirement of each question, the way the candidates answered them and the analysis of their responses. Extracts of the candidates' responses are inserted to illustrate the cases presented.

It is expected that the report will be useful to different stake holders such as prospective candidates, teachers, parents and educationists. It is also expected that the report will enable teachers to improve the teaching and learning of Civics in a way that minimizes the students' misconceptions on the subject.

# 2.0 ANALYSIS OF THE CANDIDATES' PERFORMANCE PER QUESTION

### 2.1 Question 1: Multiple choice

This question consisted of 10 multiple choice items derived from various topics of the syllabus. The candidates were required to choose one correct answer from the five alternatives given. This question was compulsory and was attempted by 95.9 percent of all the candidates. The performance was not good as 3.1 percent scored a 0 mark while 85.9 percent scored from 1 to 5 marks. Only 11.0 percent scored from 6 to 10 marks.

Items (iii), (vii) and (viii) were not answered correctly by most candidates. In item (iii) the candidates were given a list of five different years from which they were required to identify a year the United Nations Organization (UNO) adopted the Universal Declaration of Human Rights. The correct option was 'C' 1948 but due to lack of knowledge most candidates selected different years including 1945 which is the year UNO was established.

In item (vii) the candidates were asked to choose from the given alternatives what is referred to as the ability of a person to analyze, evaluate and describe the quality of something, an action or decision. Most candidates opted for 'C' problem solving instead of the correct option 'D' critical thinking. Such misconception was caused by the failure of the candidates to differentiate between problem solving and critical thinking. Problem solving is concerned with the way a person or community deals with a difficult situation while critical thinking deals with the ability of an individual to analyze, evaluate and describe the quality of an action or decision.

Item (viii) required the candidates to identify the first important stage needed in order to make a healthy decision on any problem. The correct response was 'E' to identify and clearly understand the challenge but most candidates opted for 'B' choose the best alternative solution. Such candidates failed even to reason out that it is impossible to solve unknown problem. Other distractors 'C' seeking guidance and counseling from peers, 'A' developing self-confidence and 'D' seeking advice from religious leaders were opted by few candidates because they are not related in any way with the steps needed in order to make a healthy decision making.

The items which were performed well by candidates were items (i), (iv) and (x). Item (i) for instance, required the candidates to identify what is referred to as biological differences between men and women. The majority of the candidates managed to choose the correct answer 'A' sex. Other incorrect

alternatives such as *gender*, *gender analysis*, *masculinity and gender gap* were chosen by few candidates, which is an indication that the majority of candidates had enough knowledge on the subject matter.

Item (iv) required the candidates to identify the reasons for encouraging a culture of preventive care and maintenance of public property in Tanzania. The majority of candidates managed to choose the correct answer 'E' it can reduce costs of repair and prolong the life span of property. Other incorrect alternative were chosen by few candidates because they were not plausible.

Item (x) candidates were required to choose from the given alternatives the importance of preserving our national culture. The majority of candidates chose 'C' is an expression of national identity and pride. Other incorrect alternatives 'A' is a tourist attraction 'B' is our historical heritage 'D' is an agent of socialization. and 'E' promotes our moral values were chosen by few candidates because they were not plausible.

#### 2.2 Question 2: Matching items

The question required the candidates to match the items in List "A" with the responses in List "B" by writing the letter corresponding to the correct response beside the item number. List "A" had definitions or descriptions of concepts related to Democracy while List "B" contained various concepts and terminologies on democracy.

This question was compulsory; therefore it was attempted by 95.9 percent of all the candidates of which 26.7 percent scored a 0 mark, while 68.9 percent scored from 1 to 5 marks. Only 4.4 percent of candidates scored from 6 to 10 out of the 10 allotted marks for this question. Among the most poorly attempted items in this question were (iv), (vii) and (viii).

In Item (iv) the correct response for an electoral system best suited for a society which is diverse was 'O' proportional representation but most candidates incorrectly matched it with 'D' multi-party democracy. The candidates who selected this option demonstrated that they did not have knowledge on the types of electoral systems therefore they linked election with multiparty democracy by looking at the close relationship of the two terms without assessing the demands of the question.

Item (vii) which was on "equal opportunity for all adult citizens to vote and be voted for was to be matched with 'H' *Universal Suffrage* but most candidates incorrectly matched it with 'E' *Democracy*. Candidates went astray because probably they did not know the meaning of Universal Suffrage which is one of the important indicators of democratic elections.

In item (viii) which was on an electoral system whereby a candidate with the most votes, not necessarily majority is elected" was incorrectly matched with varied wrong responses. The correct answer was 'K'winners take all. This indicates that majority of candidates lacked knowledge on the topic of democratic election

#### 2.3 Question 3: Comprehension

The Candidates were required to read the passage and then answer the questions that followed. The passage was about "Education for Girls in Tanzania". The intention was to measure the candidates' ability to comprehend information related to civics matters.

This question was compulsory and it was attempted by 95.9 percent of all the candidates. The score in this question were as follows: 9.5 percent scored a 0 mark, 77.2 percent scored from 1 to 5 marks and 13.3 percent scored from 6 to 10 out of the 10 allotted marks for this question.

One of the reasons for the poor performance in this question emanated from the tendency of candidates to respond to such questions by basing on what they know rather than what is in the passage. For example, in part 3 (d) the candidates were required to outline the challenges facing primary education in Tanzania according to the passage. One candidate wrote: :(i) Lack of teachers and (ii) Lack of laboratories while the correct answers according to the passage were (i) Underfunding and (ii) large class size. Part 3 (e) candidates were required to give two reasons for the increased enrolment of girls and boys in the late 1980's one candidate wrote:

- (i) They were taking a girl as a person for only marriage, being a wife and take care of the children
- (ii) A boy was taken as a powerful person and he is the one who can start and make clan in the society.

None of these responses were in the passage. The correct answer for part 3(e) was (i) introduction of the universal primary education (ii) the enactment of the education Act of 1978 which gave government powers to enforce compulsory enrolment and attendance of girls and boys in schools.

Another category of candidates provided irrelevant responses by copying some sentences or phrases from the passage which had no relevance to the question. For example, the following sentences were copied by a candidate from the passage as a response to part 3 (b):

The investment in education of girls can have the highest returns in Tanzania because it could contribute to the improvement of quality of life and enhances national development through increased economic production, improved hygienic nutritional practices as well as reduced mortality and better nutritional practices.

Another candidate copied the following sentence as a response to question 3 (d) on the challenges facing Primary education in Tanzania.

(i) The enactment of the Education Act of 1969 (ii) The act provided legal backing to ensure that children were not withdraw from school before completing the primary school cycle.

It is evident from these answers that the candidates who provided irrelevant responses had a problem of comprehending the content of the passage and were unable to assess whether what they wrote was actually answering the given question.

#### 2.4 Question 4: Culture and Our Nation

This question was divided into two parts (a) and (b). It was attempted by 95.9 percent of all the candidates. The performance shows that 111,521 candidates (31.6 %) scored a 0 mark, 63.5 percent scored from 1 to 5 marks and only 4.9 percent were able to score from 6 to 10 out of the 10 allotted marks.

Part 4 (a) of the question required candidates to outline five traditions and customs which affect the reproductive health of women. The candidates who scored a 0 mark (31.6%) could not outline even a single custom or tradition. This indicates that candidates lacked knowledge of the customs and traditions which affects reproductive health of women in Tanzania.

Spelling mistakes was also noted as some candidates could not write some English words correctly, for instance, one candidate wrote *genital multiration* instead of genital mutilation and widow inheritance was misspelt widor heritance.

Moreover, candidates wrongly extracted portions of the passage in question three and presented them as a response to this question. For example, one candidate wrote: Children acquire gender role identity as a consequence of the differential treatment, expectations and reinforcements given to boys and girls by their parents, teachers and the society. Such a candidate decided to quote this sentence which is not the correct answer simply because it carries

the word gender which is related to the question. This indicates that the candidate lacked knowledge of the subject matter and failed to know the needs of the questions.

In part 4(b) of the question candidates were required to explain the significance of the national anthem by giving five points. Most candidates provided wrong and unrelated responses to the question. For instance, some explained the significance of the national anthem as: (i) National Sovereignty (ii) Democracy (iii) multi-party system (iv) Colonialism (v) Politically (vi) national flag, (vii) national boundaries others responded by writing verses of the national anthem Mungu Ibariki Africa, Wabariki Viongozi wake. Hekima, Umoja na Amani Mungu Ibariki Africa na watu wake while others wrote some verses of the famous song which is usually sung in many secondary school to inspire patriotism Tanzania Tanzania nakupenda kwa moyo wote. This is an indication that either candidates didn't know the significance of the national anthem or failed to identify the needs of the question.

On the other hand, few candidates (4.9%) were able to outline traditions and customs which affect women's reproductive health such as female genital mutilation, early and forced marriages, food taboos, bride price, widow inheritance and sex preference while in part 4(b) they explained the significance of the National Anthem such as the symbol of Tanzania's nationality and freedom, an identity of Tanzania for international recognition, expresses a sense of belonging to Tanzania and Africa, expresses solidarity and love among all Tanzanians with respect to their nation

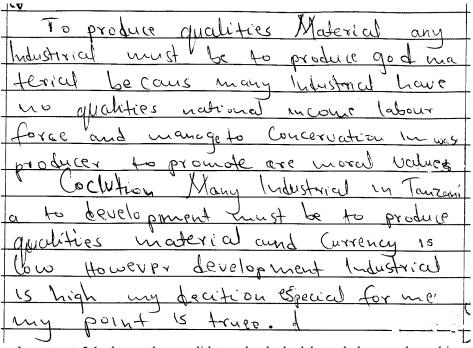

#### 2.5 Question 5: Economic and Social Development

The question required the candidates to analyse six strategies which can be employed to speed up industrial development in Tanzania. 49.2 percent of all the candidates opted for this question whereby 16.6 percent scored a 0 mark, 73.9 percent scored from 1 to 9 out of 20 allotted marks and only 9.5 percent scored from 10 to 20 out of 20 allotted marks for this question.

Examiners noted that most candidates lacked knowledge on the subject matter and hence failed to meet the demands of the question, they analyzed irrelevant strategies such as self-confidence, problem solving, labour in development and production of quality material. Other candidates misinterpreted the strategies for speeding up industrial development in Tanzania with the factors of production such as raw materials, labour, land and energy consumption. Extract 5.1 shows one of the candidate who failed to meet the demands of the question.

# Extract 5.1

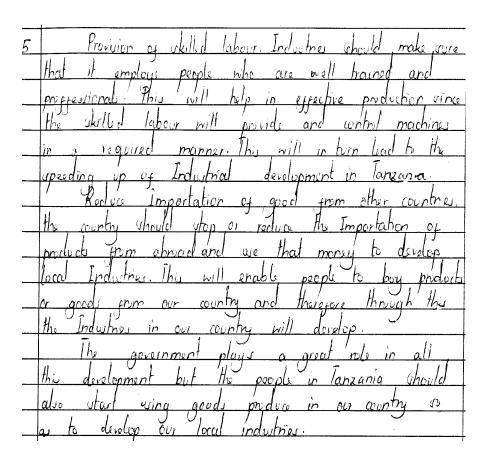

Endustrial development in Tanzania It was the major force of development Public property hould be concurred and in Tanzania because it can reduce Costs of repair and prolong the life span of the property. In extract 5.1 shows the candidate who lacked knowledge on the subject matter and failed to meet the needs of the question. Above all the essay had serious grammatical errors.

Only 9.5 percent of the candidates who attempted this question managed to score 10 marks and above out of the 20 allocated marks. The candidates were able to point out the strategies of speeding up industrial development in Tanzania such as improvement of transport and communication system, improvement and application of advanced science and technology, support from the government in terms of availability and accessibility to loans, inviting investors to the industrial sector, availability of markets, reliable power supply, reduced importation of foreign goods. Extract 5.2 represents a sample of a candidate who responded well on this question.

٠,	
<u>5</u>	Industries are the producers of products in Panzania Indust-
	rial development is you due to some reasons. Inorde to speed
	up Industrial development in Tanzania the following strategies
	must be employed.
	Facilitate importation of reience and technology. The govern-
	ment should impart science and technology from developed
	countries like America and China. Through the importation of
	latence and technology industries will use mechanized
	machines in production and this will lead to the product
	tron of goods of high quality. This will therefore
	facilitate the specding up of industrial development in
	lanzania.
	Provision of loans, the government should extend
	loans to the industries of as they can be able to
	get from ran materials readed. The government should
	provide these loans to the local industries. This will
	pinished good, are produced from and this will help
	in the development of Industries in Tanzania
	Provide aprod transport and communication gyptem.
	The government should provide good transport and comm-
	onication gutem boccure the will help in relling or
	marketing our goods even outside the country and in
	the end cut Industries will develop. Through communication
	the Industries will be able to communicate with the burger
_	Ensure reliability of power supply. Our country is
_	forced with a great problem of poor power supply
_	this has become a great obstacle in production in
_	Industrie: therefore the government should ensure that
-	there is good and reliable power supply so as
$\dashv$	to socilitate production in Industries this will also
	promote the speeding up of Industries in largeria.

Extract 5.2 the candidate managed to meet the demands of the question. He /she was able to analyse the strategies which can be employed to speed up industrial development in Tanzania such as reliable power supply, availability of loans and improved science and technology.

#### 2.6 Question 6: Culture

The question required candidates to show six efforts made since independence to promote and preserve national culture in Tanzania. 107,065 candidates (29.2%) of the candidates attempted this question, of which 58.6 percent scored a 0 mark, 39.3 percent scored from 1 to 9 out of the 20 allotted marks and only few candidates (2.1%) scored 10 marks and above out of 20 allotted marks for the question.

Most of the candidates who attempted this question lacked knowledge on the subject matter and were unable to identify the demands of the question. For example one candidate defined national culture as the culture which is naturally in the country. In the main body he/she gave irrelevant responses arguing that national culture has been promoted and preserved through good leadership, provision of education, overcoming poverty and expression of

national identity and pride. Moreover, some candidates pointed out problems encountered by Tanzania since independence such as bad weather, low level of science and technology, diseases, natural hazards, illiteracy and accumulated poverty. These responses indicate that candidates lacked knowledge of the subject matter. Extract 6.1 is an illustration of one of the candidate who went astray.

#### Extract 6.1

6. National Culture, Is the Calture Which
is Naturally in the country given for example
Tanzania howe their own Culture, thenya
have they own culture also in Uganda have
ther own culture that they mostly are
practised.
The following are the efforts that
made Since independence to promote and
precione Mational Calture in Tanzania
Good Leaderchip, due to this Leader
Ship RISO can Lead to the effort that

 Agent of Saidization

In extract 6.1 the candidate failed to define national culture and to show the efforts made since independence to promote and preserve national culture in Tanzania. Additionally his/her essay had no conclusion.

On the other hand, few candidates (2.1%) whose quality of their essays were good managed to show the efforts made since independence to promote and preserve national culture in Tanzania such as the creation of the National Kiswahili Council, Tanzania Film Company, The National Sports Council and the Museums. The creation of all these institutions aimed at promoting and preserving national culture. In their conclusion they showed obstacles that hinder the promotion of our national culture, for example colonial legacy and low level of science and technology. The extract 6.2 below is an example of one of the candidate whose essay was well organized and had relevant responses.

Extract	6.2
6	Culture
	Promotion of culture 1s the combination of efforts
	made by the people under their government to enhance
	the growth of existent which has to be practiced in a nation.
	In Tanzania the efforts of promoting and preserving
	made by the people under their government to enhance the growth of existent which has to be practiced in a nation.  In Tanzania the efforts of promoting and preserving our culture started in 1962, where by Kiswahia
	started to be used within on county. 20 43 to promo
113.00	te and to preserve our culture different efforts
	have been taken most of that efforts are;
	The National Kiswahili council, after attaining
	independence in Tanzania, the government established
	Kiswahili council in order to promote the use of this
	Language within and outside the country.
	I stanzania films Company the dollarment of
	an zania established this company so as to record
	or to store information which existed past lime
	for the filting generation benefits, for example the
	history of independence and war between Uganda and Tanzania.
	Archives, these are the places where privates
	and rubble records are kept the dovernment of
	Tanzania after getting independence established
	achives so as to store informations which happened
	long time ago for example information about millon.  The National Sports council this council
	The National Sports council this council
	was established in order to control all matters
2	about sports for example provision of sports
	equipments like balls and provision of medals.
	This helps to bring people together within our country.
	Museams. These are the places or buildings
	where historical informations and objects of
	different things for example tools used with our

6	elders are preserved. This helps the present and future
	generation to know how our elders lived. Examples
	of greas where museams are found is Musomacand
	The National museam in Der es Salaam.
	The National Festivals council, this council
	was established in order to alebrates about the
	important events that occurred last period for
	example Nyerere day and Karumo day. Also this
	council has been formed so as to promotes and
	preserve our culture by knowing what our leaders
	said and conducted for the benefits of the public.
	Apart from the efforts taken by Tanzania
	government to promote and to preserve our culture
	there are some, factors that acts as obstacles
	for the promotion of our alture for example
	colonial legacy low level of science and technology
	bad leadership and shortage of capital.

In extract 6.2 the candidate was able to show the efforts made by Tanzania since independence to promote national culture. In the conclusion he/she pointed some obstacles facing such efforts.

# 2.7 Question 7: Proper behaviour and Responsible Decision making

The question required the candidates to examine six root causes of improper behavior among the youth in Tanzania. The question was popular as it was attempted by 207,161 candidates (56.4%) of which 16.1 percent scored a 0 mark , 76.3 percent scored from 1 to 9 out of the 20 marks allotted for the question and only 7.6 percent of the candidates managed to score from 10 to 20 marks.

It was noted by the examiners that most candidates listed down types of improper behavior like drug abuse, prostitution, drinking alcohol, crimes and segregation instead of pointing out the root causes of improper behavior. Furthermore, some candidates wrote unrelated responses to the question demands such as gender bias, development in society, polygamy, respect, poor culture and no security. Such irrelevant responses indicate candidates'

lack of knowledge of the subject matter and failure to identify the demands of the question. The following extract is a good example of the candidate who failed to meet the demands of the question.

## Extract 7.1

<u>7·</u>	Befavorer is the way in which people live
	In the society. There are two types of behaviour
	which are proper behaviour and improper behaviour
-	Propor behaviorer & the behavior which i'v accep-
	table in the society evile proper chessing, respect
	It the elder while Improper behaviour is the
	behavour which is not acceptable in the vociety
	The following are the causes of improper beha-
	viorer.
	Durespect of pavents and when elden; the
	Childrens of norwhay they have no respect to
	their elden. Actual of today helshe were you
	passing across their street or home but he will
	not great you he will remain quite on it you
	ardhim have the varne age,
	The use of Abusive languages, chudrens
	of nowdays the even doesn't feel shy
	when they beeking bad things which are
	not acceptable to the society. They can
$\downarrow$	Insult even their elders.

Improper drewing alobalization to the childrens other elder wall of drewing clothes · rhonerking cornetics who are munder tending each people girtariend lothe

aking alliate drugs like alcohol this is being accesed Deer Prossure involve to enter this <u>behavierer</u> postution does not 3000- economic Inorder development her needs. above punto ane rauses Improper behavour society ave nut acceptable new queinment could Jemina about the 1 m proper tollowing have the pregnancieu and marnage

In extract 7.1 the candidate misinterpreted the demands of the question. He/she examined types of improper behavior instead of the root causes of improper behaviour.

On the other hand, the candidates who scored from 10 to 17 out of the 20 allotted marks (7.6%) were able to define improper behavior as actions which are not morally accepted by members of the family or society. In the main body they were able to examine the root causes of improper behaviour such as peer group's pressure, lack of employment, poverty, lack of education, lack of parental care and the development of science and technology (globalization). Extract 7.2 illustrates this case.

#### Extract 7.2.

7 Improper behaviour are those action which are not
morally accepted by the member of a tamily order
eties example prostitution, drugs abuse and lack of
doscipline in the society or tarney.
The tollowing are root causes of improper be
haviour among the south us lanzania:
feer groups or pressure to the one of the cause
es of improper behaviour like the use of drugite
monim which someone do because of influence from
his or her group.
Lack of Employment also is the causes of in
proper behaviour because if someone bave no any job
he or the decides to make things which are improper
to the society example robbery or thick.
Poverty also in the one of the carries of impro
per behaviour like prostitution due to terroly po
verty so someone especial girls decide to conduct
prostrution inorder to got her basic necessities:
and a Ediration that raise many youth in
Tanzania abo can come improper behaviour like
Tanzania abo can came improper behaviour like  tape which many yarth especial Nale conductives
refer to satisfy their needs without knowing me
eleants of rape in the society.

parental Care abo like the one

Extract 7.2 is a sample of a relatively good essay. The candidate managed to point out some root causes of improper behaviour such as peer group pressure, poverty, lack of parental care and the influence of globalization.

# 2.8 Question 8 : Economic and Social Development

The question required candidates to suggest six measures for addressing the challenges facing the private sector in Tanzania. A total of 115,798 candidates (31.5%) attempted this question, of which 27.6 percent scored 0 mark, 63.5 percent scored from 1 to 9 marks and only 8.9 percent scored from 10 to 20 out of the 20 allocated marks for the question.

Most candidates failed to differentiate between "challenges" and "measures" hence they provided challenges such as poor government support, lack of capital, poor transport and communication, lack of markets, high taxes charged by the government and lack of skilled labour. Such responses were irrelevant to the question. Extract 8.1 below is a sample of a candidate who failed to identify the task of the question.

#### Extract 8.1

8	Private vector is a category in a country in which
	major means of provision of goods and revoices are not
	owned by the government. Private rectors include educational
	health, Financial institutions and many others. The private
	sector helps much in the development of Tanzania. Though
	growing fact the private rector faces a lot of challenges.
	Thoso challenges are as follows:
	Poor or lack funds, private rectors donot have
	enough money and funds to enable them to run their activi
	-lies runftly. Hence it still fails to provide more qualified
	and enough goods and rervices as desired by the people
-	Thus they are not run very well.
	Poor management and administration of the private
	rectors. Most of the private rector do not lead the private
-	vectors well and lead to mirrure of funds which were to
	be used in provision of services and goods for example most
	of the private schools do not have good administration to
	anable vitudents to be well disciplined hence failure.
_	Moreover private vectors face poor provision of social
	vervices like electricity and water. This rome times
	hinders production especially in vectors like industries
	education and other as they fall to get good sorvices
	to enable early run of the orivate rectors.

Also private vector pace the challenge of poor science and technology which is required for fast and easy production of goods and corvices to the people. For example nome of plantations use hand hoes in production instead of tractors for easy and fast cultivation. Also many fams (private farms) depend on rain for growth of plants instead of irrigation.

turthermore private sector pace the the running artem skilled school teachers market <u>mout</u> <u>private</u> roctors considered aro enterprenure 1 poonle a high interest rates Loany . Hence itu market private vectors should and required services. provision . If the challenges <u>private</u> sectors development

In extract 8.1 the candidate failed to address the demands of the question as a result in the main body he/she discussed the challenges facing the private sector such as problem of the market, lack of funds, lack of skilled labour and poor technology.

The quality of the candidates' responses who were able to score from 10 to 20 out of the 20 allotted marks was good. They were able to suggest the measures of addressing the challenges facing the private sector in Tanzania such as provision of loans, building of better transport and communication systems, importation of better science and technology, proper government support and tax reduction. Extract 8.2 illustrates a candidate whose essay addressed the demands of the question.

#### Extract 8.2

8	The private sector refer to the sector which is
	under private ownership, as it does not owned by the
	government. The private sector can be categoried into two
	Types, these are informal private sector and formal private
	sector, Informal private sector is the kind of sector which
	does not follow strictly rules and principles laid down by
	the government in order to undertake their activities for exam
	Ple street vendors, village masons and carpenters, but
***************************************	Formal private sector is one of the private sector which
	follows strictly rules and principles laid down by the gover

8	munt morder to undertake their activities for example school,
	dispensary and even banks. The following are the six measure
	s to address the challenges facing the private sector in Tanza
	ma.9s follow,
	The government should provide enough funds to the priva
- 1	te sector, The private sector always faces with lack of
	enough funds. Thereby the government should take measures
	of providing enough capitals morder to enable the private
	to grow and develop well. For example street vendors, ma
	sons, banks and private schools and dispensaries fail to develo
	P well fust because of lack of proper funds.
	To improve transport and communication networks, The
	private sector such as informal sector and formal face by
	lack of transport and communication networks, thereby the
	government of Tanzania should take measures of improvi
31	ng transport and communication networks such as roads,
	railways, ports and harbours morder to address the challe
	nge of transport and communication to private sectors.
	To provide enough education on how to improper imp
	rove their activities. The government Should provide educati
4	on to the private sector's owners in order to know how
, ,	to improve their sector. Since education in very impor
	rtant Thing for the development of any sector, thereby
	the education should be provided to the private sector
	especially informal and formal sectors in Tanzania.
	To improve level of science and technology in pri
	vate sector, The government of Tanzania should take
	step of improving science and technology by introdu
	cing modern tools and equipments to be used in private
	sector in order to develop those sectors. High level
1	of science and technology can help to develop private
	sector especially informal and formal private sections

8	To improve the market in Tanzania. The private				
	Sector faces with problem of proper market that's why				
-	It does not develop well. Thereby the government of Tanzani				
	a should should take measure of improve the market				
	in order to permit the investment of private sector they				
	The proper market is needed in order to improve the de				
	Velopment of private sector in Tanzania.				
To prepare conduicive environment and planne					
	ronment to the private sector, private sector especially				
	informal sector is facing wiby the problem of lack of				
	conduiding and planned environment, thereby the government				
	of Tanzania Should take measure of preparing the plann				
	ed and conduidue environment for the private sector morde				
	r to ensure the development of those sectors in Tanzania.				
	Thereby the government of Tanzania Should consider				
	the measures to be taken in order to improve the private				
	Sector such as education, market and improvement of scie				
-	nce and technology so as to ensure development in our country				

In extract 8.2 the candidate provided a relatively good introduction and in the main body pointed out some measures of addressing the challenges facing the private sector such as provision of capital, improvement of transport, communication, science and technology.

# 2.9 Question 9 : Gender

The question required the candidates to examine four institutions which undermine women in Tanzania. This was the least attempted question since only 85,609 candidates (23.3%) attempted it of which 64.3 percent scored a 0 mark, 27.6 percent scored from 1 to 9 out of the 20 allotted marks and only 8.1 percent scored from 10 to 20 out of 20 allocated marks.

Examiners noted that most candidates (64.3%) failed to meet the demands of the question by discussing the measures of liberating women such as provision of education to women, provision of loans and grants, abolition of bad cultural customs, equal ownership of property to men and women and

others discussed traditions and customs which undermine women such as female genital mutilation, forced marriage; inheritance of widows and polygamy. Extract 9.1 illustrates such a case.

#### Extract 9.1.

	The struggle against women discrimination and oppression is facility many challenges in Tenzania.	
	11 equilit many challenger in tenzania	
	The struggle against woman discrimination	
	and resterion Wil oring muny thatenine in	
	Jamana - The institutions whileh quillemine women	
	in tunoniy are.	
	Janzana: The institutions whileh undermine women in Jugaria are.  Finale Genital Multivation (FGM): This due	
	challence in Tynzanio	L
	Challenge in Tapzania.	
	Forced marriage: Due to ather wingty	
	they forced therefore yource their alitres to be	
	a marriage.	L
	they forced thereby force their whiten to be a marriage. But if it the cause of	~
	abuttenues in Januar when the people given	,
	bride place they they sell othere children	L
	like a cow and other.	L
	Poligamy: Nue to the man who have	7
	Chattenger in Tanzan when the people given bride place they they sell others children who have policiamy. Due to the man who have more than one wife they cause the challenger in Tanzania:	
	in Tanzania.	
	So this Struggle against women Diskumi	
	instituons which undermine whomen in	1
	instituons which undermine whomen in	-
	Tanzania.	
_	1	1

In extract 9.1 the candidate failed to meet the needs of the question. He/she discussed traditons and customs such as female genital mutilation, forced marriage,bride price and polygamy instead of institutions such as the family, traditional ,religious and the decision making bodies . Above all, the candidate lacked English language skills.

Likewise, another category of candidates who scored a 0 mark discussed the institutions which promotes and fight for the welfare of women in Tanzania. Such institutions are Tanzania Media Women Association (TAMWA), Tanzania Women Lawyer Association (TAWLA) and Wanawake na Maendeleo (WAMA). Such irrelevant responses indicate that the topic on gender issues is not exhaustively taught. Extract 9.2 represents a sample of a candidate who failed to meet the requirement of the question.

#### Extract 9.2

9.	Women discrimination and oppression refers to the				
	Situation in which female gender is treated haishly and				
	not given equal chance. This includes accessibility of resources				
	Such as Land and properties, not given equal chance at				
	School. Through discrimination and oppression many institu				
tions have been formulated invider to empure wom					
	The pllowing are the institutions which undermine women				
	in Tanzania:				
	Firstly TAMWA (Tanzania Medical Women Association)				
	this deals with the reproductive health of women				
where by it gives knowledge upon food tabous of Fertility where by it enables women to get nutrit					
	regulation of Fertity so that to avoid diseases that				
	However TAWLA (Tanzania Women Lawyer Association),				
1	this inditation deals with the women right where by				
- 1	it enables women to access things such as house,				
- 1	Land and cars when their hugband have dies. This is				
- 1	because in many societies women inheritance of				
1	spause is taking place although widows are not even				
	willing to do that and because lawyers in the court				
	can defend that oppression and discrimination can not				
	be there since a woman is given a chance to defend				
	the properties and also security is given by the court so				
	that a woman can not be undermined.				
,					

More over WAMA (Wanawake na Maendeleo),					
this is an institution that motivates women toward					
hard working so that men can not oppress and					
discriminate them in the society. This is giving enough					
knowledge to people especially women on how to take					
Loans from the banks so that they can employ					
9. Themselves inorder for not staying at home waiting					
For a man to bring things like a goal keeper. Through					
this institution development have been achieved.					
Furthermore TACAIDS, this is an institution that					
1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 - 1 -					

doing so women are able to be taken to the hospital by their men during pregnacy and also girls are taken to school so that to gain knowledge like buys.

To wind up women discrimination and oppression in Tanzania has been facing many challenges but through different institutions it has been abolished due to the education provided through different advertisement in television and radios against women. By doing so women are given enough chance at school and in the society. Therefore the government should give enough support to the institutions such as TANWA, TAWLA, WAMA and TACAIDS, which by harder so that to bring equality in the society.

In extract 9.2 the candidate went astray by examining the institution such as TAMWA, WAMA and TAWLA which promotes the welfare of women. Besides that , the essay contained some factual errors whereby the long form of TAMWA was referred to as Tanzania Medical Women Association instead of Tanzania Media Women Association and TACAIDS was erronously referred to as an institution which deals with girl child rights in Tanzania.

However, few candidates (8.1%) who scored from 10 to 20 out of the 20 allocated marks were able to address the needs of the question in well organized essays by examining the institutions which undermine women in Tanzania such as religious, educational, traditional and work places. Extract 9.3 serves as a testimony to this good performance.

#### Extract 9.3

09.	Women discrimination Is the stuation where by
	awmen are heated harshly and are denied from
	aetting their right, while women dipression is the
	domination of women. There are some cultural
	practice which undermine women like polygamy,
	female genital mutilation and Forced marriage
	The institution, which mostly have put emphasize
	on women discrimination and oppression are as follows
	deligious institutions It is true that in
	both religions that is christian and Muslime
	considers women are unabled people, this is
	considers women are unabled people, this is according to the guran and Bible where a
	evoman is not supposed to hold any position
	in the church indeady men are more preferable
	in churches and Mosque, hence women continue
	to be left out in holding positions, also a muslim
-	is allowed to have more than one wife that is
	polygamy, hence discrimination and oppression continuel Education institutions; It is also true that
	Education institutions; It is also true that
	even in education boys are more preferable that
	girls, For example in science subjects like physics, Mathematics, Bidogy and chemistry are for boys
	Mathematics, Bidogy and chemistry are for boys
	but subject like Kiswahili are for girls therefore
	this shows that there is discrimination to girls.
	and also women team more about cooking
	and sewing activities where most boys are engineed
	and doctors this shows that there is high oppression
	on of girls and women in education.

Mork place: It is true that even in working place women continue to be discriminated and oppressed because the one who employed prefer more men than women because women are

preanancies to stup. & m plou pr for lex momin continue aills being duvelnme plani toomen craanizat ano are women Loomen oppression

In extract 9.3 the candidate managed to examine institutions which undermine women in Tanzania. The candidate concluded the essay by suggesting measures to address the challenges. However, the essay had some grammatical errors.

#### 2.10 **Question 10: HIV/AIDS**

This optional question required candidates to elaborate six socio-economic impacts of HIV/AIDS to people in Tanzania. 180,284 candidates (49%) selected the question, of which 8.3 percent scored from 10 to 20 out of the 20 allocated marks, 76.5 percent scored from 1 to 9 out of the 20 allotted marks. and 15.2 percent of the candidates scored a 0 mark.

Candidates who scored a 0 mark (15.2%) lacked knowledge on the subject matter and misinterpreted the question. In the introduction the majority could not write HIV as The Human Immune Deficiency Virus instead many wrote it wrongly as Human immuny virus.

In elaborating the impact of HIV/AIDS some candidates went astray and explained the positive impact associated with the spread of HIV/AIDS such as promotion of health education, provision of employment to people, increase of health centre and nutritional practice.

Other candidates misinterpreted the question by pointing out the mode of transmission of HIV/AIDS such as sexual intercourse, blood transfusion and sharing razor blades. The extract 10.1 below shows a sample of a candidate who failed to meet the requirements of the question.

# Extract 10.1

HIDOI	INDEA INDIVIDER.						
10	Her / AIDT this Means Human Immung						
	Lurus and Ains is Acquired, immuny deffice						
ency syndromy

	there for the HILL XIDI are the Spe				
	Cidly group which should give them enco				
	wrage for life and help them to Support				
	their like. To promote Education man about				
	+ HIY/XIDI-give them hope and so on.				

In extract 10.1 the candidate misinterpreted the question by explaining the positive impact associated with the spread of HIV/AIDS such as provision of social services, increase of special group centre's, nutritional practice and provision of employment. Besides that, the English language used was not impressive.

On the other hand, candidates who scored from 10 to 20 marks (8.3 %) were able to articulate relevant points such as stigmatization, constraints to the government resources, loss of manpower, increased poverty and their essays were well organized. The extract 10.2 represents a sample of a candidate who responded well on this question.

# Extract 10. 2

10. AIDS is the disease which is Caused by virus known					
as HIV where as, AIDS stands for "Agyired Immuno Defficien					
Syndrome" and HIV stands for "Human Immundefficiency Virus"The					
desease is so pandemic that the global cries on h					
to cure it since has got no specified medicine. Its true that					
HIVIAIDS is a thread to future prosperty of many rations					
The following are the Social economic impacts of the					
HIVIAIDS to people in Tanzania					
The increase of death rates; It has been observed					
that most of people dies of AIDS thus increase the					
number of misfortunes in our nations. Also the death is					
increased due to the fact that the disease is ignificable					
Hence we need to make sure that people prevent themselves					
from Alps.					
Increase in economic Stagnation; This is due to fact					
most of youngs who are national productives die of					
AIDS thus Creating economic Stagnation and wide Spread of poverty in our families. More-ever the					
Increase of Streat childrens; These are Children					
who lives in streets and most of them are the ones					
whose their mother lost their lives during delivery due					
to HV/AIDS infections as the result the child had.					
no where to go rather than living in Streets					
Also increase in family Conflicts; Where as must					
of the family members become inform in Conflicts on trying					
to find the one who has spread the disease to the					
other one in the house. This is due to the fact that					
the decease is also spread by unsafe sexual intercourse					
thus if any one in marriage become unforthful there is					
great possibility of transfering HIVIAIDS infection in					
the family					

10.	Also the disease increases the state of dependence;						
	This is due to the fact that most of people who suffer						
	from HIV/ AIDS becomes dependent to their family member						
	Since they. Can not work on their Own for employment						
	on manure workers thus making the family unstable						
	Last but not least there is the increase in the						
	Stigmatization; This is caused by the fear that if.						
	you Stay with the people who lives with HIV/AIDS						
	you will also be infected. Thus people who lives with						
	HIVIAIDS faces a lot of Segragation by other people						
	How-ever this is not true because the disease is not sprok						
	by shaking hands, eating or Sitting with the people who						
	is infected.						
	· Concluserely; the desease is - caused by Sharing						
	of Sharp tools, having unsafe Sexually interconce with						
	the one who is infected, through blood which is lensage						
	being transfised, as well as from the infected mother						
	to the Child during or after birth. Thus we should						
	not Stigmatize the people living with HIVIAIDS. We at						
	need to Support them on that deadful moment.						

In extract 10.2 the candidate elaborated the impact of HIV/AIDS in Tanzania such as increase of street children, increase of death rate and stigmatization.

#### 3.0 CONCLUSION

Basing on the analysis of the candidates' performance in each topic tested in the examination, the percentage of candidates who scored 40 marks and above in each question was low (see appendix A). The only question with a relatively good performance (40.9%) was a multiple choice question (question 1) followed by question 3 (comprehension) whereby 38.9 percent of candidates scored 40 marks and above. It is evident from the report that most candidates' responses were below the expected standards in terms of content, organization and language. Also some of the candidates failed to

score high marks because they were not able to identify the requirement of the questions and a good number of candidates lacked knowledge of the subject matter. It can, therefore be concluded that almost all the tested topics in the examination namely; Culture, Gender, Our Nation, Democracy, Economic and Social Development, Proper behaviour and Responsible Decision Making and HIV/AIDS were not performed well.

#### 3.1 RECOMMENDATIONS

In order to improve the performance of candidates in this subject it is recommended that:

- (a) Teachers should exhaustively teach the topics stipulated in the syllabus.
- (b) Students should be encouraged to speak and read a variety of books written in English in order to improve their language proficiency.
- (c) Teachers should spend more time in imparting knowledge and techniques to students on how to identify the tasks in a given question. This will help the candidates not to give wrong and unrelated responses.
- (d) The candidates should read carefully the examination questions in order to be in a position to identify the requirement of the questions.
- (e) Civics clubs and inter-schools debating clubs should be encouraged so as to promote and broaden students' knowledge on pertinent national, cross cutting issues and international issues.
- (f) School administration and managers should avail to schools adequate and relevant Civics teaching and learning materials.

# Appendix A

# ANALYSIS OF CANDIDATES PERFORMANCE IN EACH TOPIC

# 011 Civics

S/N	Торіс	Question number	The percentage of candidates who scored 40 and above marks	Remarks
1	A Multiple Choice question from 8	1	40.9	Average
	topics
